Response to Arguments

1. Applicant's arguments, see Remarks, filed 7/6/2007, with respect to claims 1, 3-10, and and 12-16 have been fully considered and are persuasive. The previous rejections and objections of Office Action dated 4/20/2007 have been withdrawn.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: Claims 1, 3-10, and 12-16 are allowable over prior art references because related references do not disclose detecting spread spectrum waveforms using a first operating system to perform tasks on the signals to detect the spread spectrum signals, and then using a second operating system to further perform tasks on the signals to detect the spread spectrum signals, wherein the first and second operating systems differ (the specification describes one operating system as being MC/OS and another operating system as being VxWorks), wherein the first operating system sends executable instructions to the second operating system to generate a matrix or a portion of a matrix to detect the spread spectrum signals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
